

THE OFFICIAL ONBOARDING GUIDE

Live music battles where Africa's hottest artists go head to head, the crowd decides, and every song is an asset you can own.

 **Hosts**

 **Speakers**

 **Audience**

A **\$ongChainn** Experience • Phase Two

songchainn.xyz/wavewarz-africa

What is WaveWarz Africa?

WaveWarz Africa is the live battle arena inside the \$ongChainn app. Two artists, their best songs, one crowd, one verdict. You listen live, you vote live, you talk your talk in the chat, and the artist you back walks away with the crown. Every battle is a party and a career moment at the same time.

Host creates

A host sets up the battle: artists, songs, region

Room goes live

Voice runs on the host's X Space

Crowd votes

Audience votes and chats in real time

\$HIKULU speaks

The AI judge drops his verdict

Results drop

Winner posted to the feed and results page

Pick your role. Or play all three.

The Host

You are the ringmaster. You create the battle, choose the artists and songs, run the X Space for live commentary, control the rounds, and declare the results. The room moves at your pace.

The Speaker

You are the voice. Join the host's X Space as a speaker to commentate, hype the crowd, break down the bars, or rep your artist on the mic while the battle plays out.

The Audience

You are the judge and jury. Join any live room free, listen on X, vote for the song that moves you, talk in the chat, and if you really believe, own a piece of the song itself.

songchainn.xyz/wavewarz-africa

One link. Works on any phone or computer, no download needed. Add it to your home screen and it feels like a native app.

All you need

A phone or computer and the link above. Joining rooms, voting and chatting are completely free.

⌘ An X account

Only needed to hear the live voice room or speak on the mic. Voting and chat work without it.

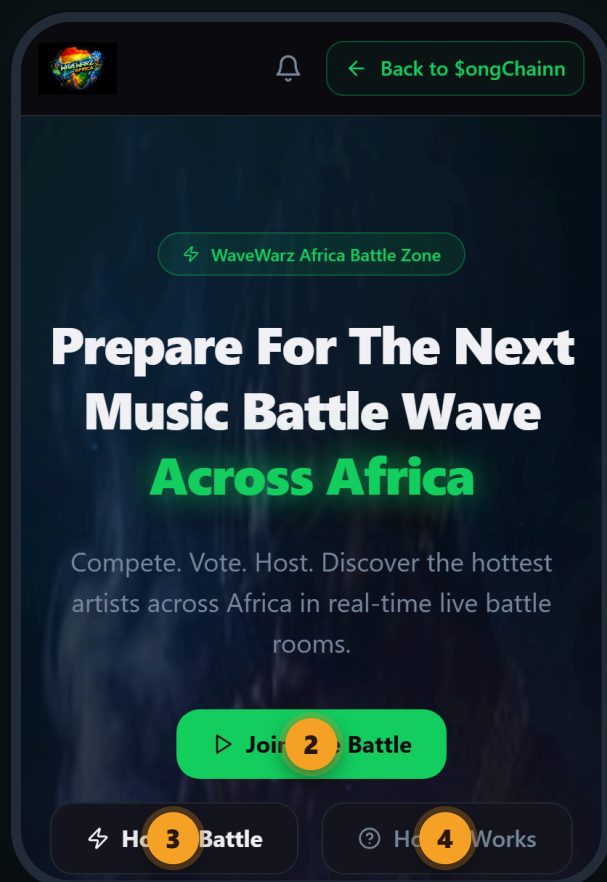

A wallet

Only if you choose to buy song coins. Totally optional, see page 8 for the "by the way".

Walk into the Zone

This is the front door of the BattleZone. Three buttons, three missions. Here is exactly what each one does.

1 Sign in to \$ongChainn

Open songchainn.xyz and sign in with your email or wallet. New here? Onboarding takes under a minute. Then hit the WaveWarz Africa banner on Home, or go straight to songchainn.xyz/wavewarz-africa.

2 Tap ▶ Join Live Battle

Takes you to every battle happening right now. This is the fastest way into the action, and it is completely free.

3 Tap ⚡ Host a Battle

For the ringmasters. Set up your own battle room in about two minutes. Full host walkthrough on page 9.

4 Tap ? How It Works

A quick in-app refresher of everything in this guide, always one tap away if you forget something.

📱 Pro move: install it

On your phone, open the site in your browser and choose "Add to Home Screen". WaveWarz Africa now lives on your phone like any other app, with notifications when battles go live.

🏠 From Home

The WaveWarz Africa banner sits right on the \$ongChainn home screen. One tap and you are in the Zone.

🔔 From notifications

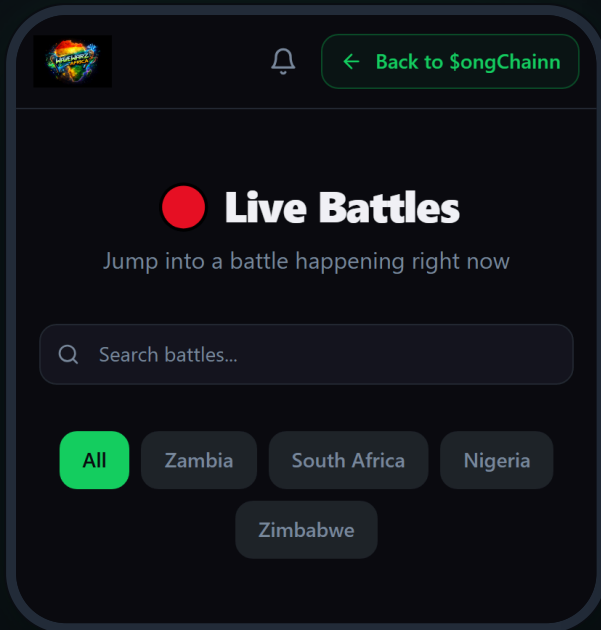

When a battle goes live, the bell rings. Tap the notification and it drops you straight into the room.

💬 From the feed

Live battles post to the social feed automatically. See one scroll past? Tap it and join the war.

Find your battle

Two tabs matter: **Live Battles** for what is happening right now, and **Upcoming** for what is about to happen. Filter by country, search by name, tap in.

The Live Battles tab with region filters

A battle card. Tap View Battle to enter

1 Pick your region

Tap **All** or filter by **Zambia**, **South Africa**, **Nigeria**, **Zimbabwe** and more.

3 Tap **View Battle**

You are in. No ticket, no fee, no waiting room.

2 Read the card

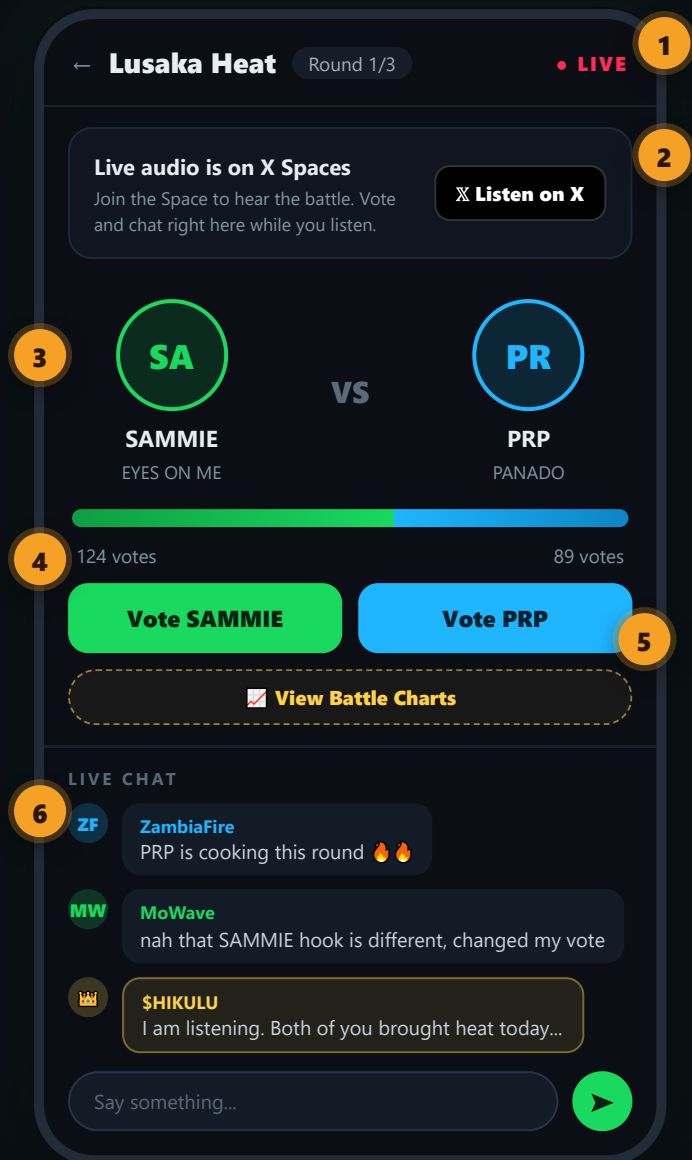

Each card shows the two artists, their battle songs, the vote split so far, the listener count, and who is hosting.

4 Not live yet?

Battles in **Upcoming** show their scheduled time. You get an in-app notification the moment the host launches, so you never miss first round.

Inside the battle room

This is where it all goes down. Every button, explained.

1 Live badge and round tracker

Quick battles are one round. Community battles run three rounds, one song per round from each artist.

2 Listen on X is your speaker

The live voice room runs on the host's X Space. Tap this to hear the songs, the commentary and the trash talk. Keep this tab open to vote and chat while you listen.

3 The face-off

Both artists, their songs and the live vote meter. Watch it swing in real time as votes land.

4 or

One vote per round, and you can change it any time before the round ends. Vote with your ears, not your friendships.

5 View Battle Charts

Opens the live trading screen for both battle songs. More on this on page 8. Totally optional, totally fun to watch.

6 The chat is the stadium

Hype your artist, react to bars, welcome newcomers. \$HIKULU reads the room too. Keep it spicy, keep it respectful.

Room etiquette

War the songs, respect the people. Hype your side without tearing the other artist down as a person. Welcome newcomers, they are tomorrow's voters. And when you lose a round, take it like a champ: there is always a rematch.

How winning works

A battle is decided by the crowd first, with two boosters stacked on top. Here is the full scoreboard.

A real battle page: vote counts and the live meter

🔥 1. Audience votes (the heavyweight)

- **Quick Battle:** one round, one song each, winner takes it.
- **Community Battle:** three rounds, one song per round. Most total votes across all rounds wins.
- You can change your vote any time before the round closes. Last tap counts.
- The host can end a battle early. Votes at the buzzer are final.

👑 2. \$HIKULU's verdict (the wildcard)

The AI judge listens to every round and weighs in after the battle. His verdict adds judge points to the final score. Meet him on the next page.

📈 3. Coin support (the booster)

Every battle song is an onchain asset. When fans buy a song's coin during the battle, that support adds score points to its side. Believers move markets, markets move scores.

🏆 When the dust settles

Results post automatically to the **Results** tab and to the \$ongChainn social feed. Winners build their reputation battle by battle, and the crowd that backed them early gets the bragging rights, the leaderboard points, and the receipts onchain.

Meet \$HIKULU

\$HIKULU

THE WISEST MAN ON THE PLANET OF MUSIC

"I have heard every kick, every snare and every lie ever told on a beat. Play your song. I will tell you the truth."

He listens in

\$HIKULU sits in every battle, taking in both songs round by round: the pen, the production, the energy, and how the crowd is moving.

He speaks after

When the battle ends, \$HIKULU drops his verdict in the room and on the results page: what won him over, what fell flat, and who earned his points.

He talks back

Chat with him in the battle room. Ask him what he thinks mid-battle. He might humble you, he might crown you. He is never boring.

\$HIKULU HAS SPOKEN • sample verdict

"SAMMIE, that hook will live in Lusaka's speakers for months. PRP, your second verse was war poetry but the mix betrayed you. Judge points to SAMMIE tonight. Run it back when the mix is ready. The planet is listening."

Every battle song is **onchain**

Here is the quiet superpower of WaveWarz Africa: the songs battling on stage are real onchain assets on \$ongChainn. This part is 100% optional. You can vote, chat and enjoy every battle without ever touching it. But if you truly believe in a song...

1 Every battle song has a song coin

Both songs in a battle exist as onchain assets. Anyone in the room can buy the song coin of the track they believe in, right from the app.

2 Buying support adds score points

Coin buys during the battle count toward that song's final score. Your money literally talks: it backs the artist and boosts their side of the scoreboard.

3 Watch it live with [View Battle Charts](#)

Tap the button in the battle room to open the live trading screen for both songs. Watch the charts race each other while the votes roll in. Two scoreboards, one battle.

4 Grow with your artist

This is the whole point. You are not just a fan in the crowd, you are early. When the artist you backed in a battle blows up, you were there onchain, receipts and all.

Your keys, your coins

Trading on \$ongChainn is non-custodial. You connect your own wallet, you hold your own assets. The app never holds your funds.

Zero pressure

Nothing in WaveWarz Africa is locked behind buying anything. Voting is free. Rooms are free. The coin layer is there for the day you hear a song and think "the world needs to know".

Golden rule

Back songs you love with amounts you are comfortable with. The best portfolio in WaveWarz is a good ear.

How to **host** a battle

Anyone signed in can host. From zero to live room in about two minutes.

The screenshot shows the 'Host a Battle' interface. At the top, there's a 'Back to \$ongChainn' button. Below it, a 'Battle Title' input field contains the text 'e.g. Lusaka Heat: The Zambian Showdown'. Underneath is a 'Region' dropdown menu currently showing 'Zambia'. The 'Battle Type' section has two options: 'Quick Battle' (selected with a green highlight) and 'Community Battle'. The 'Quick Battle' description is 'One song from each artist. Single round, winner takes it.' and the 'Community Battle' description is 'Three songs from each artist. One song per round across 3 rounds.'

The real Host a Battle screen

- 1 Tap Host a Battle and name it**
Give it a title with flavor ("Lusaka Heat: The Zambian Showdown") and pick the region.
- 2 Choose your battle type**
 Quick Battle: one song each, single round, winner takes it. **Community Battle:** three songs each, one per round across 3 rounds.
- 3 Pick the fighters**
Select Artist A and Artist B from the \$ongChainn catalog, then their battle songs. Quick needs one song each, Community needs three.
- 4 Start your X Space and paste the link**
Open X, start a Space (you can schedule it too), copy its link into **X Space Link**. Listeners get the **Listen on X** button automatically while voting and chat stay in the room.
- 5 Launch now or schedule**
 Launch Battle Now goes live instantly and notifies the community feed. Or schedule it and it sits in Upcoming until showtime.
- 6 Run the show from Host Controls**
Advance rounds, watch the vote race, and end the battle when it is done (early if you must). Results post automatically.

Host pro tips

Start your Space 10 minutes early to warm up the room • invite speakers before round one • announce vote swings out loud, it drives voting • the zone holds 5 live battles at once, so if launch is blocked, one must end first.

On the mic, and after the war

Speaking on a battle

- Voice lives on the host's **X Space**. Tap Listen on X, then request to speak in the Space, or get invited by the host.
- Artists, managers and superfans all make great speakers. Commentate rounds, break down lyrics, rep your side.
- Keep the battle room chat open next to the Space: that is where the votes and the crowd reactions live.
- Golden rule of the mic: war the songs, respect the people.

After the battle

- Check the **Results** tab for final scores and \$HIKULU's verdict.
- Winners hit the \$ongChainn feed automatically. Share the result card to X and tag the artists.
- Voting, joining rooms and showing up earn you loyalty points on the \$ongChainn leaderboard.

The Results tab: see who came out on top

	 AUDIENCE	 HOST	 SPEAKER
Get in	Live Battles → View Battle	Host a Battle → fill form	Listen on X → request mic
Your job	Vote, chat, spread the word	Launch, run rounds, declare results	Commentate and hype the Space
Voice	Listen on X	Run the X Space	Speak on the X Space
Optional	Buy song coins, watch charts	Schedule ahead, invite co-hosts	Rep an artist's side

See you in the Zone • songchainn.xyz/wavewarz-africa
